Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

Monitoring the Future: A Continuing Study of American Youth (12th-Grade Survey), 2023

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

V5523: 31460:EVER AD STIM DR

Item Number: 31460

The next questions are about drugs that doctors sometimes prescribe for people who have problems concentrating on one task at a time (attention deficit disorder), or with being too active or too disruptive (hyperactive), or both (ADHD). Stimulant-type drugs (i.e., amphetamine, methylphenidate, and pemoline) are prescribed for these conditions. These drugs include Ritalin, Adderall, Concerta, Metadate, Dexedrine, Focalin, Vyvanse, and others. Have you ever taken any of these stimulant-type prescription drugs under a doctor's supervision for these conditions? (Do not count drugs that are not stimulant-type, like Strattera, Wellbutrin, Provigil, Tenex, Intuniv, or Catapres.)
