UPDATED ICPSR PROCESSOR NOTE

This dataset was updated to correct value labels for a few variables to match more closely with the value labels provided in this codebook. Previously these value labels either had missing words in the label or assigned incorrect labels. These changes did not affect the data, this codebook, or the LRECL.

Also, the title of this study was updated to reflect current naming standards for this study.

INTRODUCTION

DATA COLLECTION DESCRIPTION

MONITORING THE FUTURE: A CONTINUING STUDY OF AMERICAN YOUTH, 1995, which is conducted by the University of Michigan's Institute for Social Research and receives its core funding from the National Institute on Drug Abuse, is an unusually comprehensive research project in several respects: surveys are conducted annually on an ongoing basis; the samples are large and nationally representative; and the subject matter is very broad, encompassing some 1400 variables per year.

The Monitoring the Future Project is designed to explore changes in many important values, behaviors, and lifestyle orientations of contemporary American youth. Two general types of tasks may be distinguished. The first is to provide a systematic and accurate "description" of the youth population of interest in a given year, and to quantify the direction and rate of the changes taking place among them over time. The second task, more analytic than descriptive, involves the "explanation" of the relationships and trends observed to exist.

DATA COLLECTION PROCEDURES

The basic research design involves annual data collections from high school seniors during the spring of each year, beginning with the class of 1975. Each data collection takes place in approximately 130 public and private high schools selected to provide an accurate cross-section of high school seniors throughout the United States.

One limitation in the design is that it does not include in the target population those young men and women who drop out of high school before graduation (or before the last few months of the senior year, to be more precise). This excludes a relatively small proportion of each age cohort -- between 15 and 20 percent -- though not an unimportant segment, since certain behaviors, such as illicit drug use and delinquency tend to be higher than average in this group. However, the addition of a representative sample of dropouts would increase the cost of the present research enormously, because of their dispersion and generally higher level of resistance to being located and interviewed.

For the purposes of estimating characteristics of the entire age group, the omission of high school dropouts does introduce certain biases; however, their small proportion sets outer limits on the bias. For the purposes of estimating "changes" from one cohort of high school seniors to another, the omission of dropouts represents a problem only if different cohorts have considerably different proportions who drop out. There is no reason to expect dramatic changes in those rates for the foreseeable future, and recently published government statistics indicate a great deal of stability in dropout rates since 1970.

Some may use this high school data to draw conclusions about changes for the entire age group. While the investigators do not encourage such extrapolation, they suspect that the conclusions reached often would be valid, since over 80 percent of the age group is in the surveyed segment of the population and changes among those not in school are likely to parallel the changes among those who are.

SAMPLING INFORMATION

The procedure for securing a nationwide sample of high school seniors is a multi-stage one. Stage 1 is the selection of particular geographic areas, Stage 2 is the selection of one or more high schools in each area, and Stage 3 is the selection of seniors within each high school.

STAGE 1: GEOGRAPHIC AREAS. The geographic areas used in this study are the primary sampling units (PSUs) developed by the Sampling Section of the Survey Research Center for use in the Center's nationwide interview studies. Because these same PSUs are used for personal interview studies by the Survey Research Center (SRC), local field representatives can be assigned to administer the data collections in practically all schools.

STAGE 2: SCHOOLS. In the major metropolitan areas more than one high school is often included in the sampling design; in most other sampling areas a single high school is sampled. In all cases, the selections of high schools are made such that the probability of drawing a school is proportionate to the size of its senior class. The larger the senior class (according to recent records), the higher the selection probability assigned to the high school. When a sampled school is unwilling to participate, a replacement school as similar to it as possible is selected from the same geographic area.

STAGE 3: STUDENTS. Within each selected school, up to about 400 seniors may be included in the data collection. In schools with fewer than 400 seniors, the usual procedure is to include all of them in the data collection. In larger schools, a subset of seniors is selected either by randomly sampling classrooms or by some other random method that is convenient for the school and judged to be unbiased. Sample weights are assigned to each respondent so as to take account of variations in the sizes of samples from one school to another, as well as the (smaller) variations in selection probabilities occurring at the earlier stages of sampling. For a table of the sample size and student response rates see Appendix B.

One other important feature of the base-year sampling procedure should be noted here. All schools (except for half of the initial 1975 sample) are asked to participate in two data collections, thereby permitting replacement of half of the total sample of schools each year. One motivation for requesting that schools participate for two years is administrative efficiency; it is a costly and time-consuming procedure to secure the cooperation of schools, and a twoyear period of participation cuts down that effort substantially. Another important advantage is that whenever an appreciable shift in scores from one graduating class to the next is observed, it is possible to check whether the shift might be attributable to some differences in the newly sampled schools. This is done simply by repeating the analysis using only the 60 or so schools which participated both years. Thus far, the half-sample approach has worked quite well and examination of drug prevalence data from the "matched half-samples" showed that the half samples of repeat schools yielded drug prevalence trends which were virtually identical to trends based on all schools.

SCHOOL RECRUITING PROCEDURES. Early during the fall semester an initial contact is made with each sampled school. First, a letter is sent to the principal describing the study and requesting permission to survey seniors. The letter is followed by a telephone call from a project staff member, who attempts to deal with any questions or problems and (when necessary) makes arrangements to contact and seek permission from other school district officials. Basically the same procedures are followed for schools asked to participate for the second year.

Once the school's agreement to participate is obtained, arrangements are made by phone for administering the questionnaires. A specific date for the survey is mutually agreed upon and a local SRC representative is assigned to carry out the administration.

ADVANCE CONTACT WITH TEACHERS AND STUDENTS. The local SRC representative is instructed to visit the school two weeks ahead of the actual date of administration. This visit serves as an occasion to meet the teachers whose classes will be affected and to provide them with a brochure describing the study, a brief set of guidelines about the questionnaire administration, and a supply of flyers to be distributed to the students a week to 10 days in advance of the questionnaire administration. The guidelines to the teachers include a suggested announcement to students at the time the flyers are distributed.

From the students' standpoint, the first information about the study usually consists of the teacher's announcement and the short descriptive flyer. In announcing the study, the teachers are asked to stress that the questionnaires used in the survey are not tests, and that there are no right or wrong answers. The flyer tells the students that they will be invited to participate in the study, points out that their participation is strictly voluntary, and stresses confidentiality (including a reference to the fact that the Monitoring the Future project has a special government grant of confidentiality which allows their answers to be protected). The flyer also serves as an informative document which the students can show to their parents.

QUESTIONNAIRE ADMINISTRATION. The questionnaire administration in each school is carried out by the local SRC representatives and their assistants, following standardized procedures detailed in a project instruction manual. The questionnaires are administered in classrooms during normal class periods whenever possible, although circumstances in some schools require the use of larger group administrations. Teachers are not asked to do anything more than introduce the SRC staff members and (in most cases) remain in the classroom to help guarantee an orderly atmosphere for the survey. Teachers are urged to avoid walking around the room, so that students may feel free to write their answers without fear of being observed.

The actual process of completing the questionnaires is quite straightforward. Respondents are given sharpened pencils and asked to use them because the questionnaires are designed for automatic scanning. Most respondents can finish within a 45 minute class period; for those who cannot, an effort is made to provide a few minutes of additional time.

PROCEDURES FOR PROTECTING CONFIDENTIALITY. In any study that relies on voluntary reporting of drug use or other illegal acts, it is essential to develop procedures which guarantee the confidentiality of such reports. It is also desirable that these procedures be described adequately to respondents so that they are comfortable about providing honest answers.

The first information given to students about the survey consists of a descriptive flyer stressing the confidentiality and voluntary participation. This theme is repeated at the start of the questionnaire administration. Each participating student is instructed to read the message on the cover of the questionnaire, which stresses the importance and value of the study, notes that answers will be kept strictly confidential, states that the study is completely voluntary, and tells the student "If there is any question you or your parents would find objectionable for any reason, just leave it blank." The instructions then point out that in a few months a summary of nationwide results will be mailed to all participants and also that a follow-up questionnaire will be sent to some students after a year. The cover message explains that these are the reasons for asking that name and address be written on a special form which will be removed from the questionnaire and handed in separately. The message also points out that the two different code numbers (one on the questionnaire and one on the tear-out form) cannot be matched except by a special computer tape at the University of Michigan.

In order to protect the confidentiality of responses and the identity of respondents, a number of alterations have been made in the original dataset to prepare it for public release; these alterations are described later in the section "Processing Information."

CONTENT AREAS AND QUESTIONNAIRE DESIGN

Drug use and related attitudes are the topics which receive the most extensive coverage in the Monitoring the Future project; but the questionnaires also deal with a wide range of other subject areas, including attitudes about government, social institutions, race relations, changing roles for women, educational aspirations, occupational aims, and marital and family plans, as well as a variety of background and demographic factors.

MEASUREMENT CONTENT AREAS

- A. DRUGS. Drug use and related attitudes and beliefs, drug availability and exposure, surrounding conditions and social meaning of drug use. Views of significant others regarding drugs.
- B. EDUCATION. Educational lifestyle, values, experiences, and environments.
- C. WORK AND LEISURE. Vocational values, meaning of work and leisure, work and leisure activities, preferences regarding occupational characteristics and type of work setting.
- D. SEX ROLES AND FAMILY. Values, attitudes, and expectations about marriage, family structure, sex roles, and sex discrimination.
- E. POPULATION CONCERNS. Values and attitudes about overpopulation and birth control.
- F. CONSERVATION, MATERIALISM, EQUITY, ETC. Values, attitudes, and expectations related to conservation, pollution, materialism, equity, and the sharing of resources.

 Preferences regarding type of dwelling and urbanicity.
- G. RELIGION. Religious affiliation, practices, and views.
- H. POLITICS. Political affiliation, activities, and views.
- I. SOCIAL CHANGE. Values, attitudes, and expectations about social change.
- J. SOCIAL PROBLEMS. Concern with various social problems facing the nation and the world.
- K. MAJOR SOCIAL INSTITUTIONS. Confidence in and commitment to various major social institutions (business, unions, branches of government, press, organized religion, military, etc.).
- L. MILITARY. Views about the armed services and the use of military force. Personal plans for military service.
- M. INTERPERSONAL RELATIONSHIPS. Qualitative and quantitative characteristics of cross-age and peer relationships. Interpersonal conflict.

- N. RACE RELATIONS. Attitudes toward and experiences with other racial groups.
- O. CONCERN FOR OTHERS. Concern for others; voluntary and charitable activities.
- P. HAPPINESS. Happiness and life satisfaction, overall and in specific life domains.
- Q. OTHER PERSONALITY VARIABLES. Attitudes about self (including self-esteem), locus of control, loneliness, risk-taking, trust in others, importance placed on various life goals, counterculture orientation, hostility.
- R. BACKGROUND. Demographic and family background characteristics, living arrangements.
- S. DEVIANT BEHAVIOR AND VICTIMIZATION. Delinquent behaviors, driving violations and accidents (including those under the influence of drugs), victimization experiences.
- T. HEALTH. Health habits, somatic symptoms, medical treatment.

Given this breadth of content, the study is not presented to respondents as a "drug use study," nor do they tend to view it as such.

Because many questions are needed to cover all of these topic areas, much of the questionnaire content is divided into different questionnaire forms which are distributed to participants in an ordered sequence. (Five forms were used in 1975-88; a sixth form was added in 1989.) This sequence produces five or six virtually identical subsamples. About one-third of each questionnaire form consists of key or "core" variables which are common to all forms. All demographic variables and some measures of drug use are included in this "core" set of measures. This use of the full sample for drug and demographic measures provides a more accurate estimation on these dimensions and also makes it possible to link them statistically to all the other measures which are included in a single form only.

REPRESENTATIVENESS AND VALIDITY

The samples for this study are intended to be representative of high school seniors throughout the 48 coterminous states. We have already discussed the fact that this definition of the sample excludes one important portion of the age cohort: those who have dropped out of high

school before nearing the end of the senior year. But given the aim of representing high school seniors, it will now be useful to consider the extent to which the obtained samples of schools and students are likely to be representative of all seniors and the degree to which the data obtained are likely to be valid.

It is possible to distinguish at least four ways in which survey data of this sort might fall short of being fully representative. First, some sampled schools refuse to participate, which could introduce some bias. Second, the failure to obtain questionnaire data from 100 percent of the students sampled in participating schools would also introduce bias. Third, the answers provided by participating students are open to both conscious and unconscious distortions which could reduce validity. Finally, limitations in sample size and/or design could place limits on the accuracy of estimates.

SCHOOL PARTICIPATION. As noted in the description of the sampling design, schools are invited to participate in the study for a two-year period. With very few exceptions, each school which has participated for one data collection has agreed to participate for a second. Thus far, from 66 percent to 80 percent of the original schools invited to participate have agreed to do so each year; for each school refusal, a similar school (in terms of size, geographic area, urbanicity, etc.) was recruited as a replacement. selection of replacement schools almost entirely removes problems of bias in region, urbanicity, and the like that might result from certain schools refusing to participate. Other potential biases are more subtle, however. For example, if it turned out that most schools with "drug problems" refused to participate, that would seriously bias the drug estimates derived from the sample. And if any other single factor were dominant in most refusals, that also might suggest a source of serious bias. In fact, however, the reasons for schools' refusals to participate are varied and largely a function of happenstance events of the particular year. Thus, the investigators feel fairly confident that school refusals have not seriously biased the surveys.

STUDENT PARTICIPATION. Completed questionnaires are obtained from three-fourths to four-fifths of all students sampled. The single most important reason that students are missed is that they are absent from class at the time of data collection, and in most cases it is not workable to schedule a special follow-up data collection for them.

Students with fairly high rates of absenteeism also report above-average rates of drug use; therefore, there is some degree of bias introduced by missing the absentees. That bias could be corrected through the use of special weighting; however, this course was not chosen because the bias in estimates (in drug use, where the potential effect was hypothesized to be largest) was determined to be quite small and because the necessary weighting procedures would have introduced undesirable complications. In addition to absenteeism, student nonparticipation occurs because of schedule conflicts with school trips and other activities which tend to be more frequent than usual during the final months of the senior year. Of course, some students refuse to complete or turn in a questionnaire. However, SRC representatives in the field estimate this proportion to be only about one percent.

VALIDITY OF SELF-REPORT DATA. Survey measures of delinquency and of drug use depend upon respondents reporting what are, in many cases, illegal acts. Thus, a critical question is whether such self-reports are likely to be valid. Like most studies dealing with these areas, the present study does not include direct, objective validation of the present measures; however, the considerable amount of inferential evidence which exists strongly suggest that the self-report questions produce largely valid data. A number of factors have given the investigators reasonable confidence about the validity of the responses to what are presumably among the most sensitive questions in the study: a low non-response rate on the drug questions; a large proportion admitting to some illicit drug use; the consistency of findings across several years of the present study; strong evidence of construct validity (based on relationships observed between variables); a close match between these data and the findings from other studies using other methods; and the findings from several methodological studies which have used objective validation methods.

As for others of the measures, a few have a long and venerable history -- as scholars of the relevant literature will recognize -- though some of these measures have been modified to fit the present questionnaire format. Many questions, however, have been developed specifically for this project through a process of question writing, pilot testing, pretesting, and question revision or elimination. Some have already been included in other publications from the study, but many have not; therefore, there exists little empirical evidence of their validity and reliability.

ACCURACY OF THE SAMPLE. A sample survey never can provide the same level of accuracy as would be obtained if the entire target population were to participate in the survey -- in the case of the present study, about 2.5-3.0 million seniors per year. But perfect accuracy of this sort would be extremely expensive and certainly not worthwhile considering the fact that a high level of accuracy can be provided by a carefully designed probability sample. The accuracy of the sample in this study is affected both by the size of the student sample and by the number of schools in which they were clustered. For the purposes of this introduction, it is sufficient to note that virtually all estimates based on the total sample have confidence intervals of +/- 1.5 percentage points or smaller - sometimes considerably smaller. This means that, had the project been able to invite all schools and all seniors in the 48 contiguous states to participate, the results from such a massive survey would be within an estimated 1.5 percentage points from the present sample findings 95 times out of 100. This is a quite high level of accuracy, and one that permits the detection of fairly small trends from one year to the next.

Because of the complex sampling design, standard means of assessing confidence intervals are not appropriate. The annual volumes from the project can provide information which allow the analyst to determine the confidence intervals around means and percentages for both the total sample and various subgroups. They also provide tables and guidelines for testing the statistical significance of differences between subgroups, and the significance of year-to-year changes.

CONSISTENCY AND THE MEASUREMENT OF TRENDS. One other point is worth noting in a discussion of the validity of the findings. The Monitoring the Future project is, by intention, a study designed to be sensitive to changes from one time to another. Accordingly, the measures and procedures have been standardized and applied consistently across each data collection. To the extent that any biases remain because of limits in school and/or student participation, and to the extent that there are distortions (lack of validity) in the responses of some students, it seems very likely that such problems will exist in much the same way from one year to the next. In other words, biases in the survey estimates should tend to be consistent from one year to another, which means that the measurement of trends should be affected very little by such biases.

INTERPRETING RACIAL DIFFERENCES. Ethnic identification is provided for the two largest racial/ethnic subgroups in the population -- those who identify themselves as white or Caucasian and those who identify themselves as black or African American. Identification is not given for the other ethnic categories (Native Americans, Asian Americans, Mexican American, Puerto Rican American, or other Latin American) since each of these groups comprises a small proportion of the sample in any given year, which means that their small Ns (in combination with their clustered groupings in a limited number of schools) would yield estimates which would be too unreliable. In fact, even African Americans -who constitute approximately 12 percent of each year's sample -- are represented by only 350 to 425 respondents per year on any single questionnaire form. Further, because our sample is a stratified clustered sample, it yields less accuracy than would be yielded by a pure random sample of equal size (see Appendix B of the annual volumes for details). Therefore, because of the limited number of cases, the margin of sampling error around any statistic describing African Americans is larger than for most other subgroups.

There exists, however, a way to determine the replicability of any finding involving racial comparisons. Since most questions are repeated from year to year, one can readily establish the degree to which a finding is replicated by looking at the results in prior and subsequent years. Given the relatively small Ns for African Americans, the analyst is urged to seek such replication before putting much faith in the reliability of any particular racial comparison.

There are factors in addition to reliability, however, which could be misleading in the interpretation of racial differences. Given the social importance which has been placed on various racial differences reported in the social science literature, the investigators would like to caution the analyst to consider the various factors which could account for differences. These factors fall into three categories: differential representation in the sample, differential response tendencies, and the confounding of race with a number of other background and demographic characteristics.

DIFFERENTIAL REPRESENTATION. Census data characterizing American young people in the approximate age range of those in this sample show somewhat lower proportions of African Americans than whites remain in school through the end of the twelfth grade. Therefore, a slightly different segment of the

African American population than of the white population resides in the target population of high school seniors. Further, the samples appear to underrepresent slightly those African American males who, according to census figures, are in high school at the twelfth grade level. Identified African American males comprise about 6 percent of the sample, whereas census data suggest that they should comprise around 7 percent. Therefore it appears that more African American males are lost from the target population than white males or females of either race. This may be due to generally poorer attendance rates on the part of some African American males and/or an unwillingness on the part of some to participate in data collections of this sort.

In sum, a smaller segment of the African American population than of the white population of high school age is represented by the data contained here. Insofar as any characteristic is associated with being a school dropout or absentee, it is likely to be somewhat disproportionately underrepresented among African Americans in the sample.

DIFFERENTIAL RESPONSE TENDENCIES. In examining the full range of variables, racial differences in response tendencies have been noted. First, the tendency to state agreement in response to agree-disagree questions is generally somewhat greater among African Americans than among whites. For example, African Americans tend to agree more with the positively worded items in the index of self-esteem, but they also tend to agree more with the negatively worded items. As it happens, that particular index has an equal number of positively and negatively worded items, so that any overall "agreement bias" should be self-cancelling when the index score is computed. However, group differences in agreement bias are likely to affect results on questions employing the agree-disagree format. Fortunately, most of the questions are not of that type.

There has also been observed a somewhat greater than average tendency for African American respondents to select extreme answer categories on attitudinal scales. For example, even if the same proportion of African Americans as whites felt positively (or negatively) about some subject, fewer of the whites are likely to say they feel very positively (or negatively). The analyst should be aware that differences in responses to particular questions may be related to these more general tendencies.

A somewhat separate issue in response tendency is a respondent's willingness to answer particular questions. The missing data rate may reflect willingness to answer particular questions. If a particular question or set of questions has a missing data rate higher than is true for the

prior or subsequent questions, then presumably more respondents than usual were unwilling (or perhaps unable) to answer it. Such an exaggerated missing data rate exists for African American males on the set of questions dealing with the respondent's own use of illicit drugs. Clearly a respondent's willingness to be candid on such questions depends on his or her trust of the research process and of the researchers themselves. The exaggerated missing data rates for African American males in these sections may reflect, at least in part, less trust. The analyst is advised to check for exceptional levels of missing data when making comparisons on any variable in which candor is likely to be reduced by lower system trust. One bit of additional evidence related to trust in the research process is that higher proportions of African Americans than whites reported that if they had used marijuana or heroin they would not have been willing to report it in the survey.

COVARIANCE WITH OTHER FACTORS. Some characteristics such as race are highly confounded (correlated) with other variables -- variables which may in fact explain some observed racial differences. Put another way, at the aggregate level we might observe a considerable racial difference on some characteristic, but once we control for some background characteristic such as socio-economic level or region of the country -- that is, once we compare the African American respondents with whites who come from similar backgrounds -- there may be no racial difference at all.

Race is correlated with important background and demographic variables. A higher proportion of African Americans live in the South and a higher proportion grew up in families with the mother and/or father absent, and more had mothers who worked while they were growing up. A substantially higher proportion of African Americans are Baptists, and African Americans tend to attribute more importance to religion than do whites. A higher proportion of African American respondents have children, and on the average they are slightly older than the white sample. As was mentioned earlier African American males are more underrepresented in our sample than African American females.

These differences in background, demographic, and ascriptive characteristics are noted because, in any attempt to understand why a racial difference exists, one would want to be able to examine the role of these covarying characteristics.

WEIGHTING INFORMATION

The change in the values of the weight variable (Var. No. 5) has, of course, consequences for the N sizes and percentage distributions in the Codebook and dataset. The codebook distributions were generated using the old, full weight values, and therefore do NOT reflect what a user can find in the dataset available for public distribution, however, ICPSR spot-checks indicate that the effects of the sampling weight change are minor, nearly always below 1 percent.

FILE STRUCTURE

MONITORING THE FUTURE: A CONTINUING STUDY OF AMERICAN YOUTH, 1995 is available from ICPSR as seven logical record length datasets. Each dataset consists of SAS and SPSS control statements containing all technical information for each variable in the corresponding datafile, and the datafile itself. The data are sorted by case. The datasets are organized by the form number (questionnaire version) used.

			logical record	unweighted
part #	form	#variables	length	N
Part 1	Core	111	122	15876
Part 2	Form 1	623	637	2658
Part 3	Form 2	339	350	2649
Part 4	Form 3	369	380	2652
Part 5	Form 4	299	312	2625
Part 6	Form 5	326	337	2647
Part 7	Form 6	382	393	2645

The SAS and SPSS data statements give the format and other information for each variable in the data file. See the section "Codebook Information" for further details. The data file is constructed with a single logical record for each case.

CODEBOOK INFORMATION

The codebook available for this study is not of the usual sort created by ICPSR. Rather, it is an edited version of the frequency tabulations presented in the annual ISR volumes put into codebook form. Consequently, the user

should note that the N sizes and percentage distributions in it are for non-missing data only, and that no information at all is provided regarding the code values or frequencies of missing data codes. It should also be noted that the codebook unlike the usual codebook is arranged by question numbers which do not coincide with the variable numbers.

The example below is a reproduction of information appearing in the machine-readable codebook for a typical variable. The numbers in brackets do not appear but are references to the descriptions which follow this example.

- [1] VAR 115 [2] 932B07A: #X MJ+HS/LIFETIME [3] NUMERIC [4] COL 26 WID 1 [5] MISSING VALUES 0 OR GE 9
- [6] B07 On how many occasions (if any) have you used marijuana (grass, pot) or hashish (hash, hash oil) ...
- [7] B07A: Marijuana/hashish-use in lifetime?

[8]	[9]	[10]
1.	0 occasions	61.8
2.	1-2	8.8
3.	3-5	5.4
4.	6-9	3.9
5.	10-19	5.0
6.	20-39	4.3
7.	40 or more	10.7

[11] Item 860 [12] N(Wtd): 15389

- [1] Indicates the variable number. A variable number is assigned to each variable in the data collection.
- [2] Indicates the abbreviated variable name used to identify the variable for the user.
- [3] Indicates the variable type. NUMERIC variables contain numbers only, including numbers in E-notation, a decimal point or a minus sign. ALPHANUMERIC variables can be any special characters: underscores (_), pound signs (#), and ampersands (&).

xvi

- [4] Indicates the starting column location and width of this variable. In this example, the variable named " 932B07A: #X MJ+HS/LIFETIME" is 1 column wide and is located in the 26th column within the record.
- [5] Indicates the code values of missing data. In this example, code values equal to 0 or greater than or equal to 9 are missing data (MISSING VALUES 0 OR GE 9). Alternative statements for other variables are "MISSING VALUES 8," "MISSING VALUES 0 OR GE 8," or "MISSING VALUES NONE". Some analysis software packages require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does not mean that the user should not or cannot use them in a substantive role if so desired.
- [6] This is the full text (question) supplied by the investigator to describe this (section of) variable(s). The question text and the numbers and letters that may appear at the beginning reflect the original wording of the questionnaire item.
- [7] Indicates an additional portion of the question or comment, explanation appended to the variable description. Brackets ("[" and "]") indicates explanations added by the investigator in the frequency tables.
- [8] Indicates the code values occurring in the data for this variable.
- [9] Indicates the textual definitions of the codes for this variable.
- [10] Indicates the frequency of occurrence of each code value for this variable. Frequencies inserted in this codebook are weighted.
- [11] Unique item reference number used to identify variables across years (see Appendix C. Cross-Time Index) of MTF project.
- [12] Indicates the number of cases for this variable excluding the missing cases.

CROSS-TIME INDEX

Because of the substantial consistency of the question content from form to form and year to year, a Cross-Time Index (Appendix C) is provided to assist the user. The Monitoring the Future Project in keeping abreast of current trends, has from time to time, added or deleted items. These changes from year to year are also documented in the Cross-Time Index.

The first column in each table is the unique item reference number, which was unvarying across years and forms. The second column is the item name in the abbreviated form used in the SAS and SPSS data statements. The next ten columns indicate the form, part (section), and questions numbers for each of the eighteen years of the survey to date, with the first character in each column being the form number, the second character being the part or section letter, and the third through sixth characters being the question number within the part.

ICPSR PROCESSING INFORMATION

The data collection was processed according to the standard ICPSR processing procedures. The data were checked for illegal or inconsistent code values which, when found, were recoded to missing data values. Consistency checks were performed. Statements bracketed in "<" and ">" signs in the body of the codebook were added by the processors for explanatory purposes. Statements bracketed in "[" and "]" were added to the tables provided by the PI, but did not appear in the questionnaire.

In order to protect the confidentiality of responses and the identity of respondents, a number of alterations and omissions have been made in the original dataset to prepare it for public release. Some questions have been eliminated from the dataset altogether (e.g., birth month, school, city, state, and student i.d. numbers; previously Variable Numbers 2, 6-12, 14-15, and 149). Other items have been left in the dataset but altered to "collapsed" or "bracketed" forms. Race (Var. No. 151) is now grouped as white/African American/ missing data. Sampling weight (Var. No. 5), which originally had a distinct value for each school, now is assigned one of six grouped values. Number of Older Brothers and Sisters, and Number of Younger Brother and Sisters (Var. Nos. 75 & 76) have been combined into a simple Number of Siblings variable. Users interested in analyses involving these items in their original form should contact the investigators.

NOTE: THE "N(WTD)" IN THE CODEBOOK EXCLUDES MISSING DATA ON THE QUESTION INVOLVED.

The N sizes and the percentage distributions are the result of using a weight variable, V5. For reasons of confidentiality, this variable was altered from its full version to a bracketed version prior to public distribution of the data; THIS RESULTS IN SLIGHT DISCREPANCIES BETWEEN THE PERCENTAGES AND N SIZES IN THE ANNUAL ISR VOLUMES AND HERE, ON THE ONE HAND, AND IN THE DISTRIBUTED DATASETS, ON THE OTHER. Typically, the variation is less than 1%.

ICPSR 6716 Page 1

PART 1: CORE

The CORE consists of variables from sections B and C across all questionnaires. The cases from these two sections (in Forms 1-6) have been combined into one part (Core) which is reflected in the total N of the frequencies.

PUBLICATIONS

ANNUAL VOLUMES CONTAINING COMPLETE RESPONSE DISTRIBUTIONS

(Published by the Institute for Social Research)

These volumes contain univariate and selected bivariate percentagized frequency distributions on all questions asked in a given year. Also contained is a cross-time index for locating the same question in the other years of the study in which it was contained. Order directly from, Monitoring the Future, Institute for Social Research, Room 2311, The University of Michigan, P. 0. Box 1248, Ann Arbor, Michigan 48106-1248.

- Monitoring the Future: Questionnaire responses from the nation's high school seniors, 1975. L.D. Johnston and J.G. Bachman, 1980.
- Monitoring the Future: Questionnaire responses from the nation's high school seniors, 1976. J.G. Bachman, L.D. Johnston, and P.M. O'Malley, 1980.
- Monitoring the Future: Questionnaire responses from the nation's high school seniors, 1977. L.D. Johnston, J.G. Bachman, and P.M. O'Malley, 1980.
- Monitoring the Future: Questionnaire responses from the nation's high school seniors, 1978. J.G. Bachman, L.D. Johnston, and P.M. O'Malley, 1980.
- Monitoring the Future: Questionnaire responses from the nation's high school seniors, 1979. L.D. Johnston, J.G. Bachman, and P.M. O'Malley, 1980.
- Monitoring the Future: Questionnaire responses from the nation's high school seniors, 1980. J.G. Bachman, L.D. Johnston, and P.M. O'Malley, 1981.
- Monitoring the Future: Questionnaire responses from the nation's high school seniors, 1981. L.D. Johnston, J.G. Bachman, and P.M. O'Malley, 1982.
- Monitoring the Future: Questionnaire responses from the nation's high school seniors, 1982. J.G. Bachman, L.D. Johnston, and P.M. O'Malley, 1984.

MONITORING THE FUTURE OCCASIONAL PAPERS

- 1 The Monitoring the Future project: Design and procedures.
 J.G. Bachman and L.D. Johnston, 1978, 67 pp.
- Concern for others and its relationship to specific attitudes on race relations, sex roles, ecology, and population control. A.R. Herzog, J.G. Bachman, and L.D. Johnston, 1978, 42 pp.
- 3 High school seniors' preferences for sharing work and family responsibilities between husband and wife. A.R. Herzog, J.G. Bachman, and L.D. Johnston, 1979, 58 pp.
- Fewer rebels, fewer causes: A profile of today's college freshmen. J.G. Bachman and L.D. Johnston, 1979, 30 pp.
- Developing composite measures of drug use: Comparisons among lifetime, annual, and monthly prevalence reports for thirteen classes of drugs. J.G. Bachman, P.M. O'Malley, and L.D. Johnston, 1979, 64 pp.
- 6 Description of a special survey using a single combined form of the Monitoring the Future questionnaires. A.R. Herzog and J.G. Bachman, 1979, 35 pp.
- 7 Ecological concerns among high school seniors: 1976-1979. J.D. Miller and J.G. Bachman, 1980, 28 pp.
- 8 Correlates of drug use, part I: Selected measures of background, recent experiences, and lifestyle orientations. J.G. Bachman, P.M. O'Malley, and L.D. Johnston, 1980, 134 pp.
- When four months equal a year: An exploration of inconsistencies in students' monthly versus yearly reports of drug use. J.G. Bachman and P.M. O'Malley, 1980, 12 pp.
- Changes in drug use after high school as a function of role status and social environment. J.G. Bachman, P.M. O'Malley, and L.D. Johnston, 1981, 92 pp.

- 12 Trends in high school seniors' views of the military.
 J.G. Bachman, 1981, 28 pp.
- 13 Marijuana decriminalization: The impact on youth 1975-1980. L.D. Johnston, P.M. O'Malley, and J.G. Bachman, 1981, 85 pp.
- 14 Period, age, and cohort effects on substance use among American youth 1976-1982. P.M. O'Malley, J.G. Bachman, and L.D. Johnston, 1983, 50 pp.
- 15 Student drug use, attitudes, and beliefs in the Department of Defense Dependent Schools class of 1982. L.D. Johnston, P.M. O'Malley, and M.L. Davis-Sacks, 1983, 72 pp.
- The impacts of response styles on black-white differences in self-esteem: An analysis of six samples of youth.

 J.G. Bachman and P.M. O'Malley, 1983, 30 pp.
- The Monitoring the Future follow-up surveys: A description of key experiences during the first years after high school. J.G. Bachman, L.D. Johnston, P.M. O`Malley, and D.E. Bare, 1985, 135 pp.
- 19 Changes in marijuana use linked to changes in perceived risks and disapproval. J.G. Bachman, L.D. Johnston, P.M. O'Malley, and R.H. Humphrey, 1986, 28 pp.
- 20 Correlates of employment among high school seniors. J.G. Bachman, D.E. Bare, and E.I. Frankie, 1986, 105 pp.
- 21 Change and consistency in the correlates of drug use among high school seniors: 1975-1986. J.G. Bachman, P.M. O'Malley, and L.D. Johnston, 1986, 21 pp.
- Differentiation of period, age, and cohort effects on drug use 1976-1986. P.M. O'Malley, J.G. Bachman, and L.D. Johnston, 1988, 62 pp.
- 23 Sex differences in adolescents' health-threatening behaviors:
 What accounts for them? A.R. Herzog, J.G. Bachman,
 L.D. Johnston, and P.M. O'Malley, 1987, 36 pp.
- 24 Student drug use in America: Differences among high schools 1986-1987. P.M. O'Malley, J.G. Bachman, and L.D. Johnston, 1988, 37 pp.
- Drug use among American college students and their non college age peers. L.D. Johnston, P.M. O'Malley, and J.G. Bachman, 1988, 40 pp.
- 26 Reducing drug use in America: A perspective, a strategy, and some promising approaches. L.D. Johnston, 1988, 57 pp.

Page 42 ICPSR 6716

28 Minimum drinking age laws effects on American youth 1976-1987 P.M. O'Malley and A.C. Wagenaar, 1990, 68 pp.

- 29 Linking trends in cocaine use to perceived risks, disapproval, and lifestyle factors: An analysis of high school seniors, 1976-1988. J.G. Bachman, L.D. Johnston, and P.M. O'Malley, 1990, 42 pp.
- 30 Drug use among black, white, hispanic, native American, and asian American high school seniors (1976-1989):

 Prevalence, trends, and correlates. J.G. Bachman,
 J.M. Wallace, Jr., C. Kurth, L.D. Johnston, and
 P.M. O'Malley, 1990, 63 pp.
- The second worldwide survey of drug and alcohol use among students in the Department of Defense dependents school system 1982-1987 L.D. Johnston, P.M. O'Malley, and L.D. Harrison, 1989, 104 pp.
- Monitoring the Future project after seventeen years: Design and procedures. J.G. Bachman, L.D. Johnston, and P.M. O'Malley, 1991, 110 pp.
- 34 The Aims and Objectives of the Monitoring the Future Study and Progress Toward Fulfilling Them. L.D. Johnston, P.M. O'Malley, J. Schulenberg, and J.G. Bachman, 1996.
- 38 The Monitoring the Future Project After Twenty-Two Years:
 Design and Procedures. J.G. Bachman, L.D. Johnston,
 and P.M. O'Malley, 1996.

APPENDIX B

SAMPLE SIZE AND STUDENT RESPONSE RATES

The three-stage sample procedure described in the introduction yielded the following number of participating schools and students.

	1975	1976	1977	1978	1979	1980
		100	100			100
# Public Schools	111	108	108	111	111	107
# Private Schools	14	15	16	20	20	20
Total # Schools	125	123	124	131	131	127
Total # Students 1	5,791	16,678	18,438	18,924	16,662	16,524
Student Response Rate (%) *	78%	77%	79%	83%	82%	82%
	1981	1982	1983	1984	1985	1986
# Public Schools	109	116	112	117	115	113
# Private Schools	19	21	22	17	17	16
Total # Schools	128	137	134	134	132	129
Total # Students 18	8,267	18,348	16,947	16,499	16,502	15,713
Student Response Rate (%) *	81%	83%	84%	83%	84%	83%

SAMPLE SIZE AND STUDENT RESPONSE RATES (continued)

1987	1988	1989	1990	1991	1992
# Public Schools 117	113	111	114	117	120
# Private Schools 18	19	22	23	19	18
Total # Schools 135	132	133	137	136	138
Total # Students 16,843	16,795	17,142	15,676	15,483	16,261
Student Response Rate (%) * 84%	83%	86%	86%	83%	84%
	1994				
# Public Schools 121	119	120)		
# Private Schools 18	20	24	1		
Total # Schools 139	139	144	1		
Total # Students 16,763	15,929	15,876	5		
Student Response Rate (%) * 84%	84%	848	2		

^{*} The student response rate is derived by dividing the attained sample by the target sample (both based on weighted numbers of cases). The target sample is based upon listings provided by schools. Since such listings may fail to take account of recent student attrition, the actual response rate may be slightly underestimated.

Page 58 ICPSR 6716

APPENDIX C

CROSS-TIME INDEX OF QUESTIONNAIRE ITEMS 1976-1995

INTRODUCTION TO THE INDEXING CONVENTIONS:

Beginning with the 1982 volume, the cross-time index of question locations is organized first by subject area (see Table 1). Within each subject area, questions are listed in numerical sequence according to item reference number, which is the unique numerical identifier assigned to each question in the study.

The Question Index may be used in two major ways:

1. LOCATING A QUESTION ACROSS YEARS:
Having located a question of interest in the Descriptive
Results section, the reader may determine in what other
years that same question has appeared by simply looking
it up by subject area and item reference number. The Index
will show all years in which that item has appeared and
also show its location each year (by questionnaire form,
section, and item number). All items will retain their
unique reference numbers in future years as well, and thus
may be located in exactly the same way in subsequent
volumes in this series.

EXAMPLE: A reader interested in a particular item about the nation needing more long-range planning would note that it has been classified under subject area IO1 ("Expectations concerning social change") and that it has been assigned item reference number 1200. The index entry for item 1200 shows that this item has appeared in Section A of questionnaire Form 1 in all annual surveys in the series. Its question number is 2A.

2. LOCATING QUESTIONS BY SUBJECT AREA:
Given an interest in some particular subject area, one
can quickly scan the Index to locate all questions dealing
with that area. The SUBJECT AREA KEY (Table 1) lists all
the subject areas into which items are classified, along
with the alphanumeric code assigned to each area.

EXAMPLE: A reader interested in items dealing with religion should first locate the relevant code in Table 1: Code G, "Religion." The second step is to scan that section of the item index, noting for every item its item reference number and page location in this volume.

The reader may or may not find the abbreviated description of the item (given in the third column of the index and further described below) helpful in deciding whether to look up a particular item in the Descriptive Results section. Some of these descriptions are rather clear as to their meaning, but others are less so.

The definitions of column headings, and the conventions used for the entries in each column, are given below under the numbers indicated in the following-key.

- (1) ITEM REFERENCE NUMBER (IRN). A unique identification number is assigned to each question for the duration of this research and reporting series. It appears below that question in the Descriptive Results section, as well as in this index and the indices of all other volumes in this series.
- (2) QUESTION NAME (QNAME). This is a brief mnemonic description - up to 16 characters in length - that attempts to characterize the content of the question. Originally developed for question identification on OSIRIS computer files, it may in many cases allow one to determine the relevance of the question to one's own interest and thus reduce the number of irrelevant questions that must be looked up in the Descriptive Results section.
- (3) QUESTIONNAIRE LOCATION BY YEAR. An entry is provided for every year in which an item appeared in one of the study's questionnaire forms. The six (or fewer) characters comprising the entry indicate the form in which the question appeared, the section of that form, and the question number. Take as an example the questionnaire location 1A004A. This location code indicates that the question appeared in Form 1, Section A, and was labeled as Question 4a.

Page 60 ICPSR 6716

Occasionally an entry will be enclosed in parentheses. This indicates that there was a change (usually minor) in the wording of the question and/or the answer alternatives in subsequent years.

A form number (ranging from 1 to 6) is usually shown in the first character location. However, two substitute characters will replace the form number at times:

- + A plus sign indicates that the item appeared in all six forms that year and that it appeared in the same location on all forms.
- * An asterisk indicates that the item appeared in five forms (Forms 2 through 6) and in the same location on all forms.

In addition, the following characters indicate the different years in which a question appeared:

```
% % - appears in 80 but not in 81
= = - appears in 81 but not in 80
# # - appears in 82 but not in 83
< > - appears in 83 but not in 82
! ! - appears in 87 but not in 88
$ $ - appears in 88 but not in 87
( ) - slight question text change
& & - renumbered in second year
@ @ - appears in 95 but not in 92-94
? ? - appears in 93-95 but not in 92
^ ^ - appears in 94-95 but not in 92-93
! ! - appears in 92-94 but not in 95
~ - appears in 92 but not in 93-95
```

(4) SUBJECT AREA. Table 1 shows the subject content areas that have been distinguished here and gives the alphanumeric code assigned to each of them. Every question item in the index has been classified into (and listed under) one or more of the subject areas, and the index (beginning with the 1982 volume) has been organized by by subject area.

SUBJECT AREA KEY

(Referenced by letter in the Question Index)

A. DRUGS. Drug use and related attitudes and beliefs, drug availability and exposure, surrounding conditions and social meaning of drug use. Views of significant others regarding drugs.

```
A01
    Use of Various Licit and Illicit Drugs
       A01a - . . in lifetime
       A01b - . . in the last 12 months
       A01c - ... in the last 30 days
       A01d -Quantity used
       A01e -How high? (How often?)
       A01f -How long high?
       A01g -Incidence of first use
       A01h -Use with other drugs
       A01i -Try to stop?
       A01j -Use on doctor's orders?
       A01k -Bad trip?
       A011 -Kinds of drugs
A02 Exposure to Drug Use
       A02a -Friends' use of drugs
       A02b -Exposure to users
A03a Availability of Drugs
A04a Expected Future Use
    Conditions of Use
       A05a -Alone
       A05b -With others
       A05c -Settings (at school, at home, etc.)
       A05d -Mode of drug administration
    Reasons for Use, Abstention, and Stopping
       A06a -Reasons for drug use
       A06b -Reasons for abstention from, or stopping drug use
    Drug Problems
       A07a -Driving, tickets, and accidents after use
       A07b -Other problems
A08a Sources of Help and Treatment regarding Drugs
    Others' Awareness of Use
       A09a -Parental awareness of use
       A09b -Others' awareness of use
       A09c -Police awareness of use

A17b -Perceived attitudes regarding drugs

B. EDUCATION.

- B01 High school: scholastic status, objectives, experiences
- B02 Combining work and school: attitudes, experiences
- B03 Interracial contact at school
- B04 Student norms, misbehavior in class
- B05 Counseling
- B06 Absenteeism and truancy
- B07 Delinquency, victimization and feeling safe at school
- B08 Opinions regarding competency testing
- B09 Post high school: status, plans, characteristics
- B10 Attitudes regarding educational institutions
- B11 High school: length of experiences

C. WORK AND LEISURE

- C01 Present or recent work experience
- C02 Income sources; financial security
- CO3 Vocational plans, aspirations, expectations
- CO4 Preferences regarding job characteristics
- C05 Desirability of different working arrangements and settings
- C06 Work ethic/success orientation
- C07 Leisure time: extent, activities
- C08 Attitudes toward leisure time

D. SEX ROLES AND FAMILY.

- D01 Dating and marriage: status, attitudes, expectations
- D02 Parenthood: status, attitudes, expectations
- D03 Values surrounding marriage and family
- D04 Preferences regarding marital/familial arrangements
- D05 Sex role attitudes
- D06 Opinions regarding sex discrimination

E. POPULATION CONCERNS.

- E01 Overpopulation
- E02 Birth control

F. CONSERVATION, MATERIALISM, EQUITY, ETC.

- F01 Personal materialism
- F02 Societal materialism and advertising
- F03 Concern with world hunger and poverty
- F04 Ecological concerns

Page 64 ICPSR 6716

- F05 Concern with conservation of resources
- F06 Preferences regarding dwelling type and urbanicity
- F07 Driving and use of mass transit
- G. RELIGION. Religious preferences, activities, views.
- H. POLITICS.
 - H01 Political interest and preferences
 - H02 Attitudes toward governmental policies and practices

 - H04 Confidence in government
 - H05 Voting, political activism
- I. SOCIAL CHANGE.
 - I01 Expectations concerning societal change
 - IO2 Attitudes regarding activism
 - 103 Reactions to personal and social change
- J. SOCIAL PROBLEMS. Interest and concerns
- K. MAJOR SOCIAL INSTITUTIONS.
 - K01 Trust (See also C05: Institutions as work settings)
 - K02 Satisfaction with performance
 - K03 Preferred influence
- L. MILITARY.
 - L01 Plans for military service
 - L02 Attitudes toward a draft
 - LO3 Views about the use of military force
 - L04 Attitudes toward the military as an institution and occupation

M. INTERPERSONAL RELATIONSHIPS.

- M01 Dating
- M02 Cross-age relationships with adults outside the family (See also B05)
- M03 Agreement/disagreement with parents
- M04 Friendships (See also Q03: Loneliness)
- M05 Community at large

N. RACE RELATIONS.

- N01 Preferred interracial contact
- NO2 Attitudes about discrimination
- NO3 Actual interracial contacts

O. CONCERN FOR OTHERS.

- 001 Attitudes regarding social service, charitable activism
- 002 Involvement in community, altruistic activities
- 003 Concern with the problems of others

P. HAPPINESS.

- P01 Happiness: satisfaction with life and self
- P02 Satisfaction with specific life domains

Q. OTHER PERSONALITY VARIABLES.

- Q01 Attitudes about self, self-esteem
- 002 Locus of control
- Q03 Loneliness
- Q04 Risk taking
- Q05 Trust in others
- Q06 (Changed to Subject Areas T01-T04.)

Page 66 ICPSR 6716

- Q07 Importance placed on various life goals
- Q08 Social, political, cultural orientation
- Q09 Hostility

R. BACKGROUND.

- R01 Age, sex, race, and marital status
- R02 Family characteristics
- R03 Living arrangements and household characteristics

S. DEVIANCE AND VICTIMIZATION.

- S01 Delinquent behaviors
- S02 Driving violations and accidents
- S03 Victimization experiences

T. HEALTH.

- T01 Symptoms
- T02 Habits
- T03 Height and weight
- T04 Medical treatment

KEY TO:

"& & - renumbered in second year"

Question 4D13a was numbered 4D15a in 1988. Question 4D15a was numbered 4D17a in 1988. Ouestion 4D13b was numbered 4D15b in 1988. Ouestion 4D15b was numbered 4D17b in 1988. Ouestion 4D13c was numbered 4D15c in 1988. Ouestion 4D15c was numbered 4D17c in 1988. Ouestion 4D14 was numbered 4D16 in 1988. Ouestion 4D16 was numbered 4D18 in 1988. Questions 6A20a-m were numbered 6A21a-m in 1994-1995. Question 6A17p was numbered 6A18p in 1994-1995. Questions 6A15a-c were numbered 6A16a-c in 1994-1995. Questions 6A16a-c were numbered 6A17a-c in 1994-1995. Ouestion 4E11 was numbered 4E10 in 1988. Ouestions 4E12a-d were numbered 4E11a-d in 1988. Ouestions 6A19a-o were numbered 6A20a-o in 1994-1995. Ouestions 4E08a-m were numbered 4E07a-m in 1988. Questions 6A18a-o were numbered 6A19a-o in 1994-1995. Questions 5E09-11 were numbered 5E014-16 in 1981. Questions 4E09a-c were numbered 4E08a-c in 1988. Questions 4E10a-d were numbered 4E09a-d in 1988. Question 6A14 was numbered 6A15 in 1994-1995. Questions 6A15a-c were numbered 6A16a-c in 1994-1995. Questions 6A16a-c were numbered 6A17a-c in 1994-1995. Ouestions 5E08a-q were numbered 5E13a-q in 1981. Ouestions 6A17c and 6A17n were numbered 6A18c and 6A18n in 1994-1995. Questions 5D04a-f were numbered 5D02a-f in 1981. Question 4E07b was numbered 4E06b in 1988. Question 4E07k was numbered 4E06k in 1988.

Question 4E07I was numbered 4E06I in 1988.

Questions 4E07n-o were numbered 4E06n-o in 1988.

Page 68 ICPSR 6716

Questions 4E07a-o were numbered 4E06a-o in 1988. Questions 6A17a-b were numbered 6A18a-b in 1994-1995.

Question 4E07m was numbered 4E06m in 1988.

Questions 6A17a-q were numbered 6A18a-q in 1994-1995.

Questions 5E08a-g were numbered 5E13a-g in 1981.
